Video Instructions

2. Press power button to turn on. The green light will blink while warming, and will glow steady when ready.

6. Press power button to start brewing. The green light will rotate while brewing and will glow steady when complete.

4. Open machine head by pressing upwards on the curved lever.

5. With machine open, insert capsule onto the round brewing head with dome shape facing downwards.

3. Place cup under coffee outlet.

1. Make sure the water tank is filled either by lifting the reservoir to remove and fill, or by pouring water into it while it's in place.
